

## **ROCKFROST HD HEAT TRANSFER FLUID**

Rockfrost HD heat transfer fluid is a formulation of propylene glycol and a specially designed package of industrial corrosion inhibitors. The fluid is dyed for leak detection purposes (yellow is standard). Rockfrost is preferred for use where low toxicity is desired.

Recommended use temperature range: -60 °F to 250 °F (-50 °C to 120 °C).

Suitable applications: closed-loop, water-based HVAC, process heating and cooling, etc.

If food contact is possible, do not use this product, use Rockfrost FG

### Composition (% by weight)

Propylene Glycol	92.0
Performance Additives	8.0
Color	Yellow
Specific Gravity 77/77°F (25/25°C)	1.050-1.060
pH of Solution (50 percent glycol)	9.0-10.0
Reserve Alkalinity (min.)	10.0 ml
